

**CLAIM AMENDMENTS**

1. (Canceled)

2. (Canceled)

3. (Currently Amended)      ~~The apparatus of claim 2~~      A lint roller/fluid dispenser apparatus comprising:

a container containing a cleaning media dispensable from the container;

a lint roll having an adhesive outer surface; and

means for mounting the lint roll on the container comprising:

a hollow support, the support having an inner bore opened

from one end, the bore having a diameter for slidably

receiving one end portion of the container therein; and

wherein:

one end of the container projects outwardly from the support,

after the container is mounted in the support, to act as a

handle for use of the lint roll.

4. (Canceled)

5. (Currently Amended) ~~The apparatus of claim 4~~      A lint roller/fluid dispenser apparatus comprising:

a container containing a cleaning media dispensable from the container;

a lint roll having an adhesive outer surface;

means for mounting the lint roll on the container comprising:

a hollow support, the support having an inner bore opened from one end, the bore having a diameter for slidably receiving one end portion of the container therein; and means for rotatably mounting the lint roll on the support wherein the rotatable mounting means comprises comprising:

a pair of spaced bearing surfaces formed on the support, the lint roll rotatably mounted on the bearing surfaces.

6. (Currently Amended) ~~The apparatus of claim 2~~ A lint roller/fluid dispenser apparatus comprising:

a container containing a cleaning media dispensable from the container;  
a lint roll having an adhesive outer surface; and  
means for mounting the lint roll on the container  
comprising:

a hollow support, the support having an inner bore opened from one end, the bore having a diameter for slidably receiving one end portion of the container therein;

~~wherein the mounting means comprises~~

a first collar mountable on the container at an intermediate position spaced from one end of the container;  
at least one projection carried on the end of the container and spaced from the first collar; and  
the lint roll mounted between the projection and the first collar over the container.

7. (Currently Amended) ~~The apparatus of claim 1~~ A lint roller/fluid dispenser apparatus comprising:

a container containing a cleaning media dispensable from the container;

a lint roll having an adhesive outer surface; and

means for mounting the lint roll on the container

~~wherein the mounting means comprises~~ comprising:

a spindle having opposed first and second end collars;

and

at least one of the first and second end collars having a through

aperture for mounting of the spindle over a portion of the container.

8. (Currently Amended) ~~The apparatus of claim 2~~ A lint roller/fluid dispenser apparatus comprising:

a container containing a cleaning media dispensable from the container;

a lint roll having an adhesive outer surface; and

means for mounting the lint roll on the container comprising:

a hollow tubular support, the support having an inner bore opened from one end, the bore having a diameter for slidably receiving one end portion of the container therein;

~~and wherein the mounting means comprises:~~

~~a tubular support;~~

means carried on the support for rotatably mounting the lint roll on the support; and

means, carried on the support, for releasibly mounting one end of the support on to the container.

9. (Currently Amended) ~~The apparatus of claim 2~~ A lint roller/fluid dispenser apparatus comprising:

a container containing a cleaning media dispensable from the container;

a lint roll having an adhesive outer surface; and

means for mounting the lint roll on the container, said mounting means comprising:

a hollow support, the support having an inner bore  
opened from one end, the bore having a diameter for slidably  
receiving one end portion of the container therein,  
~~wherein the mounting means comprises:~~

a cap mountable over a discharge end of the  
container; and

means, carried on the cap, for supporting the lint roll  
on the cap.

10. (Original ) The apparatus of claim 9 wherein the rotatable mounting means comprises:

a pair of spaced arms carried on the cap, the lint roll rotatably disposed between the pair of arms.

11. (Currently Amended) ~~The apparatus of claim 2~~ A lint roller/fluid dispenser apparatus comprising:

a container containing a cleaning media dispensable from the container;

a lint roll having an adhesive outer surface; and

means for mounting the lint roll on the container comprising:

a hollow support, the support having an inner bore opened from one end, the bore having a diameter for slidably receiving one end portion of the container therein, and wherein the apparatus further comprising includes:

a discharge nozzle carried on one end of the container;  
the mounting means including a support mounted on one end of the container;  
a pair of arms projecting from the support and rotatably carrying the lint roll therebetween; and  
an aperture formed in the support adjacent to the discharge nozzle to allow discharging of the contents of the container through the discharge nozzle and the support.
